

## AMENDMENTS TO THE SPECIFICATION

The Office Action objected to several spelling errors in the specification.

In accord with correcting the spelling errors, please replace “pivatable” on page 2, line 5 with “pivotable” so that the paragraph of the affected part of the specification now reads:

“FIGURE 1 discloses a tire-hanging device 20. The tire hanging device 20 includes a hoist wrap section 22, an elongated section 24, and a tire hanging section 26. Further, the tire-hanging device 20 also preferably incorporates a ~~pivatable~~ pivotable joint 28 located in the elongated section 24. The pivotable joint 28 preferably includes a pin 30 and a locking device 38.”

Similarly in accord with correcting the spelling errors, please replace “axel” on page 2, line 32 with “axle” so that the paragraph of the affected part of the specification now reads:

“FIGURE 3 is another view of the tire-hanging device 20 holding an automotive tire. The picture illustrates the tire hanging section 26 extending through the ~~axel~~ axle hole in the automotive wheel. Further, the upwardly directed tire hanging section 26 prevents the tire from falling from the free end 34 of the tire hanging section 26.”

No new matter has been added to the specification.
